## V. Keeping Our Products Safe

### A. NavigationData

The information systems and software procedures relied upon to operate this web site acquire personal data as part of their standard functioning; the transmission of such data is an inherent feature of Internet communication

protocols. Such information is not collected in order to relate it to identified data subjects, however it might allow user identification per se after being processed and matched with data held by third parties. This data category includes IP addresses and/or the domain names of the computers used by any user connecting with this web site, the URI (Uniform Resource Identifier) addresses of the requested resources, the time of such requests, the method used for submitting a given request to the server, returned file size, a numerical code relating to server response status (successfully performed, error, etc.), and other parameters related to the user's operating system and computer environment. These data are only used to extract anonymous statistical information on website use as well as to check its functioning; they are erased immediately after being processed. The data might be used to establish liability in case computer crimes are committed against the website; except for this circumstance, any data on web contacts is currently retained for no longer than seven days.

## B. Cookies

No personal data concerning users is acquired by the website in this regard. No cookies are used to transmit personal information, nor are so-called persistent cookies or user tracking systems implemented. Use of the so-called session cookies – which are not stored permanently on the user's computer and disappear upon closing the browser – is exclusively limited to the transmission of session ID's – consisting of server-generated casual numbers – as necessary to allow secure, effective navigation. The so-called session cookies used by this website make it unnecessary to implement other computer techniques that are potentially detrimental to the confidentiality of user navigation, whilst they do not allow acquiring the user's personal identification data.

## C. Data Provided Voluntarily by User

Sending e-mail messages to the addresses mentioned on this website, which is done on the basis of a freely chosen, explicit, and voluntary option, entails acquisition of the sender's address, which is necessary in order to reply to any request, as well as of such additional personal data as is contained in the message(s). We may also collect personal information through sign-up forms and as part of your registration for a specific service from this website.
